

Haidy Gabal

Junior .NET Developer

haidy.a.gabal2024@gmail.com | +201270337369 | Giza, Egypt | github.com/haidyaGabal | linkedin.com/in/haidy-gabal

SUMMARY

Junior .NET Developer with hands-on experience building full-stack applications using ASP.NET Core, EF Core, and SQL Server. Applies Clean Architecture, SOLID principles, and the Repository/Unit of Work pattern to build secure, maintainable systems. Demonstrated through a shipping management platform and an e-commerce project with JWT authentication.

EDUCATION

Bachelor's in Computer Science

SVU – Faculty of Computer and Information

September 2020 - June 2024

TRAINING AND INTERNSHIP EXPERIENCE

ASP.NET Core Backend Development Training, IT Legend

April 2026 - July 2026 (3 Months)

- Completed a structured, mentor-led online training covering the full software project lifecycle: requirements gathering, database design, and system implementation.
- Built backend services using Generic Repository and Unit of Work patterns, Service and DTO layers, and JWT authentication with refresh tokens.
- Implemented role-based workflow logic, RESTful APIs, and PayPal payment gateway integration.
- Applied the training directly to build the Shipping System project.

Summer Training Programs, Information Technology Institute (ITI)

2021 - 2023

- Software Engineering Fundamentals I: Programming with C, Object-Oriented Programming with C++, Data Structures and Algorithms.
- Web Development Fundamentals: HTML5, CSS3, JavaScript, Responsive Web Design.
- CMS-WordPress: HTML, CSS, Bootstrap, WordPress.

PROJECTS

Shipping System Website

github.com/haidyaGabal/ShippingSystem-CleanArchitecture

- Developed a full-stack shipping management platform with real-time shipment tracking and role-based workflows for Admin and User roles.
- Built using Clean Architecture with Presentation, Application, Domain, and Infrastructure layers, and Repository and Unit of Work patterns.
- Secured the application with JWT authentication and ASP.NET Identity; documented RESTful APIs with Swagger and AutoMapper.

E-commerce Website (Techora)

github.com/haidyaGabal/E-commerce_Techora

- Developed an e-commerce platform managing 100+ products across multiple categories using N-Tier Architecture.
- Designed a database schema with 10+ related entities using Entity Framework Core; implemented JWT-based authentication.
- Built an admin panel for inventory management and a responsive frontend using Bootstrap and Razor Pages.

SKILLS

- Backend Development: C#, .NET Core, ASP.NET Core Web API, MVC
- Database and ORM: SQL Server, Entity Framework Core, LINQ
- Architecture and Principles: Clean Architecture, SOLID Principles, OOP, Design Patterns
- Authentication and Security: JWT, ASP.NET Identity, Role-Based Access Control
- Tools and Version Control: Git, GitHub, Swagger, AutoMapper
- Frontend Basics: HTML, CSS, JavaScript, Bootstrap, Razor Pages

CERTIFICATES

- C# Object-Oriented Programming, IT Legend
- Web Development with ASP.NET Core, IT Legend
