

Haidy Gabal

Junior .NET Developer

haidy.a.gabal2024@gmail.com | +201270337369 | Qena, Egypt

github.com/haidyaGabal | linkedin.com/in/haidy-gabal

Summary

Junior .NET Developer with hands-on experience building full-stack web applications using ASP.NET Core, Entity Framework Core, and SQL Server. Skilled in developing scalable backend systems with RESTful APIs, and secure authentication using JWT and ASP.NET Identity. Applies clean architecture principles, maintainable coding practices, and software development best practices to deliver production-ready solutions. Passionate about backend development and continuous learning.

Projects

Shipping System Website

github.com/haidyaGabal/ShippingSystem-CleanArchitecture

- Developed a full-stack shipping management platform supporting real-time shipment tracking and role-based user workflows.
- Designed and implemented a scalable N-Tier Architecture to ensure maintainability and separation of concerns.
- Built and documented RESTful APIs using ASP.NET Core, DTOs, AutoMapper, and Swagger.
- Secured the application using JWT authentication and ASP.NET Identity with role-based authorization.
- Applied Repository and Unit of Work patterns to structure data access with Entity Framework Core.
- Created an admin dashboard for managing users, shipments, and operational workflows.

E-commerce Website (Techora)

github.com/haidyaGabal/E-commerce_Techora

- Developed a web-based e-commerce platform for managing products, categories, and electronic device listings.
- Designed the system using N-Tier Architecture to ensure separation of concerns and maintainability.
- Built an admin panel to manage inventory, product details, and category relationships.
- Designed and managed the database schema using Entity Framework Core.
- Implemented JWT-based authentication for secure access control.
- Developed a responsive frontend using Bootstrap and Razor Pages.

Skills

Backend Development: C#, .NET Core, ASP.NET Core Web API, MVC

Database & ORM: SQL Server, Entity Framework Core, LINQ

Architecture & Principles: Clean Architecture, SOLID Principles, OOP, Design Patterns

Authentication & Security: JWT, ASP.NET Identity, Role-Based Access Control

Tools & Version Control: Git, GitHub, Swagger, AutoMapper

Frontend Basics: HTML, CSS, JavaScript, Bootstrap, Razor Pages

Soft Skills: Problem Solving, Teamwork, Communication, Time Management, Agile/Scrum

Education

Bachelor's in Computer Science

SVU – Faculty of Computer and Information

Sep 2020 – Jun 2024

Certificates

C# Advanced Programming – IT Legend

Web Development with ASP.NET Core - IT Legend

Languages

- Arabic: Native
- English: B1 (Intermediate)
